

# Philip Respironics DreamWisp Nasal Mask

The Philips Respironics DreamWisp makes finding the right cushion size a breeze. The mask comes in a Fit Pack that includes the three most popular cushion sizes (small, medium and large). The fit pack takes all the guess work out of finding the right size for you.

The newly designed DreamWisp is a combination of the Philips Respironics DreamWear top-of-the-head tube design and Wisp minimal contact nasal cushion. This new mask design concept makes the DreamWisp the all-around most comfortable, lightweight nasal CPAP mask.

The DreamWisp is designed to direct airflow through the frame and the tubing connection at the top of the head which allows the user to sleep in any position they want without the restrictions of the tubing, providing freedom of movement throughout the night.
